Product highlights

iPod & MP3 audio listening
Guests can listen to music from the source of their choice (iPod, other MP3 Player, or audio output from their PC) through plug & play connection with 3.5mm audio jack

Viewing of video media
Viewing of video media from PC, camcorder, DVD player and various other devices is supported through VGA, composite audio/video, S-Video and HDMI connectors

Interactive entertainment
Game consoles can be connected to the TV through composite audio/video or HDMI connectors.

USB charging
USB 5V power socket allows guests to charge their personal devices.

Auto detect audio/video input
Audio and video inputs are auto detecting, so that the TV will automatically switch to the right input when a device is plugged in.

Push button control
Guests can switch between different inputs at the touch of a single button.

Indicator lights
Indicator lights provide easy to understand feedback to guests, by showing which input is active.

System configurations
Connectivity Panel supports various interactive and entertainment hotel TV system configurations, through industry standard Philips SmartPort protocol.

Stand alone configurations
Seamless integration with Philips TVs in stand-alone configuration is supported, see compatibility list.

VGA-to-HDMI converter
With the built-in VGA-to-HDMI converter this Connectivity Panel is compatible with a wider range of Philips Hospitality TV's, since a separate VGA input on the TV is not required.

Multiple mounting options
Philips Convenience Panel can be mounted in various ways, e.g. in the wall, on the desk or as a furniture build-in. An optional desktop kit is required to mount the panel to a desk.

Built for commercial use
Philips Connectivity Panel is a commercial product, built with high-quality materials for intensive daily use by hotel guests.
